BASIC SKILLS: ANGULAR 2.+ • NODEJS • PHP • SCSS/SASS/LESS • MONGODB • ORACLE • GOOGLE ANALYTICS/SEARCH CONSOLE/MANAGER • SEO

## PROFESSIONAL EXPERIENCE

### Web Developer

Dolphin Solutions FZ (L.L.C) - Dubai

April 2017 – Present (7 years)

- Implemented modular concepts and standard coding practices for web applications.
- Conducted training sessions to effectively onboard new developers.
- Reviewed and approved team pull requests using Azure DevOps.
- Designed database components including table structures, procedures, functions, triggers, SQL jobs, and data tables.
- Published and deployed web applications and databases across different environments, including client-server and Azure.
- Conducted system debugging, troubleshooting, and research to propose system enhancement solutions.

### Web Specialist

Music Tribe - Philippines

Sep 2016 – March 2017 (6 months)

- Create new components and templates based on mockup designs.
- Develop website scraper integrated with MySQL Database.
- Migrate old websites to a new environment.
- Modify existing code.

### Software Engineer

Yondu, Inc. - Philippines

Sep 2014 – Jul 2016 (1 year and 10 months)

- Contributed to the WiFi project as part of the new product development team.
- Developed a Captive Portal web application and provided Level 3 support.
- Researched and designed a comprehensive WiFi solution.
- Produced documentation including diagrams, process flows, and error databases.
- Conducted debugging and troubleshooting across user, network, and system errors.

### Web Developer

Samsung - Philippines

Nov 2012 - Jan 2013 (3 months)

- Proficient in developing and designing systems using HTML, PHP, jQuery, and MSSQL.
- Experienced in creating database structures to support system functionality and performance.

## **Senior Software Engineer**

BPO International, Inc. - Philippines

(Sr.) Feb 2013 – Aug 2014 (1 year and 7 months)  
(Jr.) Apr 2011 – Oct 2012 (1 year and 7 months)

- Developed and designed a web application and database structure.
- Troubleshooted and maintained the existing system.
- Set up and administer client databases.
- Provided system update reports.
- Researched new ideas for system development.
- Implemented new functionalities to enhance the system.
- Analyzed the system flow.

## **EDUCATION**

### **Bachelor of Science in Information Technology**

Informatics College, Northgate Cyberzone, Alabang, Muntinlupa City, Philippines

2008 - 2011

Awards: *Dean's List Award, Best Audio Visual Presentation Making Group Contest*

## **CERTIFICATES**

ADOBE Web Content Management System - Yondu

Programming in HTML5 with JavaScript and CSS3 Specialist - Microsoft Certified Professional

Effective Business Communication Phoenix One - The Knowledge Institute

## **PROJECTS**

### **ERP Web Application**

The system developed on the web features different types of modules such as Job Costing, Retail, CAFM, Task Management, Web Ticketing, Timesheet, HR Management, and others.

### **WiFi**

The system was developed on both Physical Server and Cloud Server platforms (AWS and Rackspace). On the Physical Server, we utilized IPtables and DHCP. On the Cloud Server, we employed Aruba Networks and Squid Proxy Server. Both servers feature a Captive Portal, a web page displayed before accessing the Internet, integrated with the Facebook API for login to grant Internet access.

### **Time and Attendance System**

The system comprises a combination of modules including Leave Management, Overtime Management, Schedule Management, and Timekeeping. It offers PDF and Excel reports, as well as email notifications for every transaction. Clients can access the system via the internet.

### **Employee Connection**

The system was developed to display updated news, photos, birthday celebrants, an employee feedback module, an office directory, and it is also connected to the Time and Attendance System.

### **Online Report System**

The system provides a final report (Leaves, Balance, Man-Hours Worked, Absenteeism, Payslip PDF, and Credit Profile PDF) from the Time and Attendance System. Some clients use ASP.NET for their company systems and can access the system using SOAP.

### **Account Payable and Expenses Report Monitoring System**

The system was developed to track and monitor the status of client invoices. This system is used by Receivers, Processors, and Reviewers to process the invoices.

### **Consumer Training Program**

Online training registration for consumers.
